HOW TO ORDER...

1 CHOOSE YOUR DOOR STYLE AND FINISH

The most important choice when determining the look of your bathroom is door style and finish. Choose from the classic shaker style of Legacy or the ultra modern simplicity of Calm slab style doors.

2 COMBINATION AND DEPTH OF UNITS

Consider the available space in your bathroom and choose from either standard depth (353mm) or space saving reduced depth (218mm) units. Establish how you use your space and plan your design accordingly.

3 CHOOSE YOUR WORKTOP OR ALL IN ONE ISOCAST BASIN

Select a worktop from either laminate or solid surface options. Alternatively opt for an integrated basin and worktop for a seamless look.

4 PANELS, PLINTHS AND BATH PANELS

Clad-on end panels are available for all finishes. They can also be used between units to achieve a framed effect. Plinths are available to create a fully integrated floor mounted look or alternatively you can wall mount your furniture.

DON'T FORGET TO ORDER YOUR CLADDING PANELS!

5 HANDLES AND OTHER BITS

Add the perfect finishing touch to your chosen doors with our stylish selection of handles available in a range of finishes. Add other finishing touches from the Tavistock range. Taps, Mirrors, Basins and WCs are available.

QUALITY SPECIFICATIONS

- **Anti-Slip** - The Zamori anti-slip option features the highest possible anti-slip rating. The anti-slip surface is embedded into the tray material during the manufacturing process. - **Antibacterial** - All Zamori trays are impregnated with a bacteria and mould lighting "Zemoic" agent. The antibacterial property of Zamori trays means increased hygiene and easier cleaning
- **Patent Re-inforcement** - Zamori trays are acrylic capped and feature a patented steel reinforcement frame within the tray. This ensures strength, rigidity and a lifetime of use

- Lightweight but incredibly strong
- Flexible installation. Trays can be fitted on, sunk into and above the floor

PIN LUX - BENEFITS TO COLD START BRASSWARE

With the new generation of Cold Start brassware, the default start position is cold water only. The handle needs to be turned to the left to gradually introduce the hot water - it's only at this point that the boiler is engaged. This simple fact that the opening of a tap avoids the unnecessary operation of the boiler becomes a significant energy saver, reducing CO₂ emissions into the atmosphere.

CABLE AND MEMBRANE

FEATURES AND BENEFITS

- Quick and easy to install and use
- Cost effective
- Space saver - When used as a primary heat source you don't need radiators, freeing up precious wall space
- Ideal for tiled floors. Also suitable for laminate and wood floors
- Designed to secure heating cable as well as act as a decoupling membrane
- Neutralises tensions between substrate and tiles, reducing cracking as the floor settles/moves
- Fully customisable
- Fit with flexible tile adhesive (not provided) and no levelling compound required

Combining underfloor heating and antifracture mat, this brilliant product from Redroom could save you significant money and time in fitting.

It really is as easy as 1,2,3.

Step 1

Redroom decoupling membrane goes down on the floor.

Step 2

Underfloor heating wire is spaced out within the guides on the membrane.

Step 3

It's now ready for tiling and as you would expect the membrane gives ultimate antifracture protection against tiles cracking that may occur due to settling and movement of the substrate underneath.

LUXURY VINYL FLOORING

KORLOK

Features a beautiful collection of wood look planks and stone effect tiles. The product is quickly fitted together using a simple drop and lock mechanism. This range has a solid 'rigid core' construction, which makes it less pliable and suitable for laying over uneven surfaces. If you're worried about noise, the acoustic backing reduces sound transfer to rooms below by 21dB, and there is no need for a separate underlay.

- 13 wood look planks
- 9 stone effect tiles
- 5G® click-locking mechanism
- Acoustic qualities (by 21dB)
- Installs over most existing hard floors
- No underlay required

CLOSE COUPLED SENSOR FLUSH KITS

With a simple wave of the hand, hygienic, contactless flushing is now here for close coupled WCs. Two sizes are available depending on the size of the flush button hole in the cistern lid. The button kits have been designed to retro-fit to existing WCs which have paddle operated flush valves. For cisterns which have pneumatic or cable operated flush valves, or where the button screws in directly to the flush valve, then the flush valve will also need to be swapped to our TR9033 valve which has a 2" base.
